

Subject index

- accreditation**, Accreditation of general practices: challenges and lessons, **129**
- adverse drug events**, Adverse drug event trigger tool: a practical methodology for measuring medication related harm, **194**
Adverse drug events: what's the truth?, **165**
- adverse drug reactions**, Multidisciplinary medication review in nursing home residents: what are the most significant drug-related problems? The Bergen District Nursing Home (BEDNURS) study, **176**
- adverse events**, Case record review of adverse events: a new approach, **411**
Psychological contribution to the understanding of adverse events in health care, **453**
Reviewing case record review, **402**
Tracking adverse events in RCTs: lack of agreement among regulatory institutions, **234**
- ambulatory health care**, From aviation to medicine: applying concepts of aviation safety to risk management in ambulatory care, **35**
- anaesthesia**, The value of personal professional monitoring performance data and open disclosure policies in anaesthetic practice: a case report, **295**
- automation technology**, Less is (sometimes) more in cognitive engineering: the role of automation technology in improving patient safety, **291**
- bimonthly publication**, QSHC 2003: now bimonthly, **7**
- blame culture**, A tragic death: a time to blame or a time to learn?, **321**
- cancer**, Randomised controlled trial of a shared care programme for newly referred cancer patients: bridging the gap between general practice and hospital, **263**
Shared care: step down or step up?, **242**
- cardiovascular disease**, Intensive support to improve clinical decision making in cardiovascular care: a randomised controlled trial in general practice, **181**
- case mix**, Analysing differences in clinical outcomes between hospitals, **257**
- case record review**, Case record review of adverse events: a new approach, **411**
- case record review**, Reviewing case record review, **402**
- cataract surgery**, Views of older people on cataract surgery options: an assessment of preferences by conjoint analysis, **13**
- change management**, A crisis in maternity services: the courage to be wrong, **398**
Evaluating the culture of safety, **401**
Evaluation of the culture of safety: survey of clinicians and managers in an academic medical center, **405**
Healthcare leaders test a proven business strategy, **477**
Understanding and learning from organisational failure, **81**
- child protection**, Learning from tragedies: clinical lessons from the Climbé report, **82**
- children**, Effects of interventions for the treatment of nocturnal enuresis in children, **390**
The prevention and treatment of childhood obesity, **65**
- classic paper**, The hazards of hospitalization, **58**
- clinical audit**, Are audits wasting resources by measuring the wrong things? A survey of methods used to select audit review criteria, **24**
Directory of clinical databases: improving and promoting their use, **348**
- clinical databases**, Basing decisions on better quality routine clinical data, **327**
- clinical effectiveness**, Accessing the online evidence: a guide to key sources of research information on clinical and cost effectiveness, **229**
- clinical governance**, Are audits wasting resources by measuring the wrong things? A survey of methods used to select audit review criteria, **24**
Directory of clinical databases: improving and promoting their use, **348**
Errors in general practice: development of an error classification and pilot study of a method for detecting errors, **443**
Is it possible and worth keeping track of deaths within general practice? Results of a 15 year observational study, **337**
Monitoring clinical outcomes in primary care, **325**
- clinical guidelines**, About time: diagnostic guidelines that help clinicians, **205**
- clinical practice guidelines**, Deriving recommendations in clinical practice guidelines, **328**
Ethnic specific recommendations in clinical practice guidelines: a first exploratory comparison between guidelines from the USA, Canada, the UK, and the Netherlands, **353**
Is the methodological quality of guidelines declining in the US? Comparison of the quality of US Agency for Health Care Policy and Research (AHCPR) guidelines with those published subsequently, **428**
- clinical trial design**, Research designs for studies evaluating the effectiveness of change and improvement strategies, **47**
- cognitive biases**, Psychological contribution to the understanding of adverse events in health care, **453**
- cognitive engineering**, Less is (sometimes) more in cognitive engineering: the role of automation technology in improving patient safety, **291**
- cognitive ergonomics**, The role of error in organizing behaviour, **377**
- communication skills**, Learning from tragedies: clinical lessons from the Climbé report, **82**
- comparative analysis**, Using routine comparative data to assess the quality of health care: understanding and avoiding common pitfalls, **122**
- complementary medicines**, Surfing, self-medicating and safety: buying non-prescription and complementary medicines via the internet, **88**
- conjoint analysis**, Views of older people on cataract surgery options: an assessment of preferences by conjoint analysis, **13**
- cost effectiveness**, Accessing the online evidence: a guide to key sources of research information on clinical and cost effectiveness, **229**
- cost effectiveness analysis**, Value for money of changing healthcare services? Economic evaluation of quality improvement, **366**
- culture of safety**, Evaluating the culture of safety, **401**
Evaluation of the culture of safety: survey of clinicians and managers in an academic medical center, **405**
- CyberSpace**, CyberSpace .., **78**
- database quality**, Directory of clinical databases: improving and promoting their use, **348**
- death certification**, Is it possible and worth keeping track of deaths within general practice? Results of a 15 year observational study, **337**
- decision making**, A call for internet pharmacies to comply with quality standards, **86**
Intensive support to improve clinical decision making in cardiovascular care: a randomised controlled trial in general practice, **181**
Safe treatment or a shorter wait: Hobson's choice?, **5**
Shared decision making: developing the OPTION scale for measuring patient involvement, **93**
Views of older people on cataract surgery options: an assessment of preferences by conjoint analysis, **13**
- decision support systems**, Less is (sometimes) more in cognitive engineering: the role of automation technology in improving patient safety, **291**
- Delphi**, Quality indicators for primary care mental health services, **100**
- dentistry**, Clinical practice guidelines in dentistry: opinions of dental practitioners on their contribution to the quality of dental care, **107**
- depression**, Improving the detection and management of depression in primary care, **149**
- developing countries**, Drug use in sub-Saharan Africa: quality in processes—safety in use, **164**
Labelling and patient knowledge of dispensed drugs as quality indicators in primary care in Botswana, **168**
- diagnosis**, About time: diagnostic guidelines that help clinicians, **205**
- drug dispensing**, Drug use in sub-Saharan Africa: quality in processes—safety in use, **164**
Labelling and patient knowledge of dispensed drugs as quality indicators in primary care in Botswana, **168**

- drug treatment**, Investigation into the reasons for preventable drug related admissions to a medical admissions unit: observational study, **280**
- error classification**, Classifying and identifying errors, **404**
- error management**, Hindsight \neq foresight: the effect of outcome knowledge on judgment under uncertainty, **304**
Make no mistake—errors can be controlled, **359**
- errors**, Classifying and identifying errors, **404**
Errors in general practice: development of an error classification and pilot study of a method for detecting errors, **443**
- ethnicity**, Ethnic specific recommendations in clinical practice guidelines: a first exploratory comparison between guidelines from the USA, Canada, the UK, and the Netherlands, **353**
Ethnicity, equity and quality: lessons from New Zealand (*Nga mātawaka, nga āhua tika me nga painga: nga ākoranga no Aotearoa*), **237**
- ethnography**, What can ethnography do for quality and safety in health care?, **326**
- feedback**, Public opinion on systems for feeding back views to the National Health Service, **435**
- financial incentives**, Rewarding results: using financial incentives to improve quality, **397**
- financing**, Quality or financing: what drives design of the health care system?, **136**
- foresight**, Hindsight \neq foresight: the effect of outcome knowledge on judgment under uncertainty, **304**
- general practice**, Accreditation of general practices: challenges and lessons, **129**
Assessing the quality of care of multiple conditions in general practice: practical and methodological problems, **421**
Attitudes and behaviour of general practitioners and their prescribing costs: a national cross sectional survey, **29**
Developing a measure for the appropriateness of prescribing in general practice, **246**
Errors in general practice: development of an error classification and pilot study of a method for detecting errors, **443**
Guidelines and management of mild hypertensive conditions in pregnancy in rural general practices in Scotland: issues of appropriateness and access, **286**
Influence of attitudes and behaviour of GPs on prescribing costs, **6**
Intensive support to improve clinical decision making in cardiovascular care: a randomised controlled trial in general practice, **181**
Is it possible and worth keeping track of deaths within general practice? Results of a 15 year observational study, **337**
Management of hypertension in pregnancy in rural areas, **244**
Monitoring clinical outcomes in primary care, **325**
“Doing prescribing”: high hopes and unexplored beliefs, **243**
Randomised controlled trial of a shared care programme for newly referred cancer patients: bridging the gap between general practice and hospital, **263**
Rewarding results: using financial incentives to improve quality, **397**
Shared care: step down or step up?, **242**
- geriatrics**, Views of older people on cataract surgery options: an assessment of preferences by conjoint analysis, **13**
- glue ear surgery**, Glue ear surgery, **159**
- guideline recommendations**, Deriving recommendations in clinical practice guidelines, **328**
- guidelines**, Clinical practice guidelines in dentistry: opinions of dental practitioners on their contribution to the quality of dental care, **107**
Development and validation of an international appraisal instrument for assessing the quality of clinical practice guidelines: the AGREE project, **18**
Glue ear surgery, **159**
Guidelines and management of mild hypertensive conditions in pregnancy in rural general practices in Scotland: issues of appropriateness and access, **286**
Management of hypertension in pregnancy in rural areas, **244**
- health policy**, Value for money of changing healthcare services? Economic evaluation of quality improvement, **366**
- high reliability organizations**, High reliability organizational change for hospitals: translating tenets for medical professionals, **238**
- hindsight**, Hindsight \neq foresight: the effect of outcome knowledge on judgment under uncertainty, **304**
- HIV**, QUOTE-HIV: an instrument for assessing quality of HIV care from the patients’ perspective, **188**
- hospital admission**, Investigation into the reasons for preventable drug related admissions to a medical admissions unit: observational study, **280**
The hazards of hospitalization, **58**
- hospital culture**, The culture of safety: results of an organization-wide survey in 15 California hospitals, **112**
- human error**, Psychological contribution to the understanding of adverse events in health care, **453**
The role of error in organizing behaviour, **377**
- human error theory**, Causes of intravenous medication errors: an ethnographic study, **343**
- human factors engineering**, A look into the nature and causes of human errors in the intensive care unit, **143**
Human factors engineering design demonstrations can enlighten your RCA team, **119**
- human reliability**, The role of error in organizing behaviour, **377**
- hypertension in pregnancy**, Guidelines and management of mild hypertensive conditions in pregnancy in rural general practices in Scotland: issues of appropriateness and access, **286**
Management of hypertension in pregnancy in rural areas, **244**
- improvement**, Improvement, trust, and the healthcare workforce, **448**
- Institute of Medicine report**, Addressing the crisis in US health care: moving beyond denial, **1**
- intensive care**, A look into the nature and causes of human errors in the intensive care unit, **143**
- internet**, Quality indicators for mental health in primary care: how far have we got?, **85**
Surfing, self-medicating and safety: buying non-prescription and complementary medicines via the internet, **88**
The future for primary care: increased choice for patients, **83**
- international compatibility**, Can health care quality indicators be transferred between countries?, **8**
- intervention mapping**, Designing a quality improvement intervention: a systematic approach, **215**
- interventions**, Process evaluation on quality improvement interventions, **40**
- intravenous treatment**, Causes of intravenous medication errors: an ethnographic study, **343**
- intraventricular haemorrhage**, Analysing differences in clinical outcomes between hospitals, **257**
- Journal scan**, JournalScan, **156**
JournalScan.., **313**
JournalScan.., **386**
JournalScan.., **75**
- judgment**, Hindsight \neq foresight: the effect of outcome knowledge on judgment under uncertainty, **304**
- leadership**, Evaluating the culture of safety, **401**
Evaluation of the culture of safety: survey of clinicians and managers in an academic medical center, **405**
- league tables**, Using routine comparative data to assess the quality of health care: understanding and avoiding common pitfalls, **122**
- learning from experience**, Learning from samples of one or fewer, **465**
- likelihood ratios**, About time: diagnostic guidelines that help clinicians, **205**
- Māri**, Ethnicity, equity and quality: lessons from New Zealand (*Nga mātawaka, nga āhua tika me nga painga: nga ākoranga no Aotearoa*), **237**
- medical education**, Medical school attended as a predictor of medical malpractice claims, **330**
Medical school differences: beneficial diversity or harmful deviations?, **324**
- medical error**, A pilot study in ophthalmology of inter-rater reliability in classifying diagnostic errors: an underinvestigated area of medical error, **416**
Compensation as a duty of care: the case for “no fault”, **240**
Do house officers learn from their mistakes?, **221**
From aviation to medicine: applying concepts of aviation safety to risk management in ambulatory care, **35**
High reliability organizational change for hospitals: translating tenets for medical professionals, **238**
Less is (sometimes) more in cognitive engineering: the role of automation technology in improving patient safety, **291**

- Preventable in-hospital medical injury under the “no fault” system in New Zealand, **251**
- medical errors**, A look into the nature and causes of human errors in the intensive care unit, **143**
- Do house officers learn from their mistakes?, **221**
- medical indemnity**, The value of personal professional monitoring performance data and open disclosure policies in anaesthetic practice: a case report, **295**
- medical injury**, Compensation as a duty of care: the case for “no fault”, **240**
- Preventable in-hospital medical injury under the “no fault” system in New Zealand, **251**
- medical malpractice**, Medical school attended as a predictor of medical malpractice claims, **330**
- medical school**, Medical school attended as a predictor of medical malpractice claims, **330**
- Medical school differences: beneficial diversity or harmful deviations?, **324**
- medication**, Multidisciplinary medication review in nursing home residents: what are the most significant drug-related problems? The Bergen District Nursing Home (BEDNURS) study, **176**
- medication errors**, Causes of intravenous medication errors: an ethnographic study, **343**
- Investigation into the reasons for preventable drug related admissions to a medical admissions unit: observational study, **280**
- mental health**, Clinicians’ and patients’ roles in patient involvement, **87**
- Quality indicators for primary care mental health services, **100**
- methodological quality**, Is the methodological quality of guidelines declining in the US? Comparison of the quality of US Agency for Health Care Policy and Research (AHCPR) guidelines with those published subsequently, **428**
- misdiagnosis**, A pilot study in ophthalmology of inter-rater reliability in classifying diagnostic errors: an underinvestigated area of medical error, **416**
- mistake proofing**, Make no mistake—errors can be controlled, **359**
- Modular Review Form (MRF2)**, Case record review of adverse events: a new approach, **411**
- mortality trends**, Is it possible and worth keeping track of deaths within general practice? Results of a 15 year observational study, **337**
- National Health Service**, Public opinion on systems for feeding back views to the National Health Service, **435**
- User responsiveness in health care, **403**
- negligence**, Medical school attended as a predictor of medical malpractice claims, **330**
- nocturnal enuresis**, Effects of interventions for the treatment of nocturnal enuresis in children, **390**
- “no fault” system**, Compensation as a duty of care: the case for “no fault”, **240**
- Preventable in-hospital medical injury under the “no fault” system in New Zealand, **251**
- non-prescription medicines**, Surfing, self-medicating and safety: buying non-prescription and complementary medicines via the internet, **88**
- nursing homes**, Multidisciplinary medication review in nursing home residents: what are the most significant drug-related problems? The Bergen District Nursing Home (BEDNURS) study, **176**
- “At least Mom will be safe there”: the role of resident safety in nursing home quality, **201**
- Rights, risk, and autonomy: a new interpretation of falls in nursing homes, **166**
- obesity**, The prevention and treatment of childhood obesity, **65**
- online drug information**, Quality indicators for mental health in primary care: how far have we got?, **85**
- Surfing, self-medicating and safety: buying non-prescription and complementary medicines via the internet, **88**
- online evidence**, Accessing the online evidence: a guide to key sources of research information on clinical and cost effectiveness, **229**
- open disclosure**, The value of personal professional monitoring performance data and open disclosure policies in anaesthetic practice: a case report, **295**
- organisational failure**, Understanding and learning from organisational failure, **81**
- organizational culture**, Evaluation of the culture of safety: survey of clinicians and managers in an academic medical center, **405**
- The culture of safety: results of an organization-wide survey in 15 California hospitals, **112**
- organizational learning**, Learning from samples of one or fewer, **465**
