Editorials

859 Speaking up against unsafe unprofessional behaviours: the difficulty in knowing when and how
B M Wong, S Ginsburg

863 Determining the optimal place and time for procedural education
M V Pusic, M M Triola

866 Just-in-time simulation-based training
R Aggarwal

Original research

869 Speaking up about traditional and professionalism-related patient safety threats: a national survey of interns and residents
W Martinez, L S Lehmann, E J Thomas, J M Etchegaray, J T Shelburne, G B Hickson, D W Brady, A M Schleyer, J A Best, N B May, S K Bell

881 Randomised controlled trial to assess the effect of a Just-in-Time training on procedural performance: a proof-of-concept study to address procedural skill decay
J B Branzetti, A A Adedipe, M J Gittinger, E D Rosenman, S Brolliar, A K Chipman, J A Grand, R Fernandez

892 Peers without fears? Barriers to effective communication among primary care physicians and oncologists about diagnostic delays in cancer
A Lipitz-Snyderman, M Kale, L Robbins, D Pfister, E Fortier, V Pocus, S Chimonas, S N Weingart

899 Identifying patient and practice characteristics associated with patient-reported experiences of safety problems and harm: a cross-sectional study using a multilevel modelling approach
I Ricci-Cabello, D Reeves, B G Bell, J M Valderas

November 2017 Volume 26 Issue 11

908 Reliable adherence to a COPD care bundle mitigates system-level failures and reduces COPD readmissions: a system redesign using improvement science
M A Zafar, R J Panos, J Ko, L C Otten, A Gentene, M Guido, K Clark, C Lee, J Robertson, E A Alessandrini

Narrative review

919 Comparison of control charts for monitoring clinical performance using binary data
J Neuburger, K Walker, C Sherlaw-Johnson, J van der Meulen, D A Cromwell

Viewpoint

929 Incorporating nursing complexity in reimbursement coding systems: the potential impact on missed care
L Sasso, A Bagnasco, G Aleo, G Catania, N Dasso, M P Zanini, R Watson

933 How to attribute causality in quality improvement: lessons from epidemiology
A J Poots, J E Reed, T Woodcock, D Bell, D Goldmann

Short report

938 Standard admission order sets promote ordering of unnecessary investigations: a quasi-randomised evaluation in a simulated setting
B Leis, A Frost, R Bryce, K Coverett
