#### Value and Efficiency in Your Hospital

Think about the way things are done in your hospital and provide your opinions on the value and efficiency with which care is delivered.

For the purposes of this section, the following terms apply:

- ▶ Waste in health care is anything that does not add value or is unnecessary for patients, clinicians, or staff—such as wasted time; wasted materials; extra steps in a process; rework; and unnecessary tests, procedures, treatments, or services, etc.
- ▶ Efficiency in health care refers to care delivery systems and work processes that are as streamlined and simplified as possible.
- ▶ **Value** refers to high-quality care at a reasonable cost and positive patient experiences with care. Efficiency and removing waste are necessary to achieve value.
