Commentary

- 82 Differing perspectives on patient involvement in patient safety
V A Entwistle

Original articles

- 84 Making use of mortality data to improve quality and safety in general practice: a review of current approaches
R Baker, E Sullivan, J Camosso-Stefinovic, A Rashid, A Farooqi, H Blackledge, J Allen
- 90 Implementation of a medication reconciliation process in an ambulatory internal medicine clinic
C L Nassaralla, J M Naessens, R Chaudhry, M A Hansen, S M Scheitel
- 95 Confidential reporting of patient safety events in primary care: results from a multilevel classification of cognitive and system factors
O Kostopoulou, B Delaney
- 101 Lag time in an incident reporting system at a university hospital in Japan
M Hirose, S E Regenbogen, S Lipsitz, Y Imanaka, T Ishizaki, M Sekimoto, E-H Oh, A A Gawande
- 105 Antibiotic prescribing in primary care: first choice and restrictive prescribing are two different traits
M S van Roosmalen, J C C Braspenning, P A G M De Smet, R P T M Grol
- 110 An integrated care pathway for menorrhagia across the primary–secondary interface: patients' experience, clinical outcomes, and service utilisation
S Julian, N J Naftalin, M Clark, A Szczepura, A Rashid, R Baker, N Taub, M Habiba

Error management

- 116 Medication errors in paediatric care: a systematic review of epidemiology and an evaluation of evidence supporting reduction strategy recommendations
M R Miller, K A Robinson, L H Lubowski, M L Rinke, P J Pronovost
- 127 Ambulatory care adverse events and preventable adverse events leading to a hospital admission
D M Woods, E J Thomas, J L Holl, K B Weiss, T A Brennan
- 132 Using trigger phrases to detect adverse drug reactions in ambulatory care notes
M N Cantor, H J Feldman, M M Triola
- 135 Quantifying distraction and interruption in urological surgery
A N Healey, C P Primus, M Koutantji
- 140 Should patients have a role in patient safety? A safety engineering view
M Lyons

Developing research and practice

- 143 Barriers to optimal antibiotic use for community-acquired pneumonia at hospitals: a qualitative study
J A Schouten, M E J L Hulscher, S Natsch, B-J Kullberg, J W M van der Meer, R P T M Grol
- 150 Development and testing of an assessment instrument for the formative peer review of significant event analyses
J McKay, D J Murphy, P Bowie, M-L Schmuck, M Lough, K W Eva

Organisational matters

- 154 The economic burden of complications during percutaneous coronary intervention
K M Jacobson, K H Long, E K McMurtry, J M Naessens, C S Rihal

PostScript

- 160 Identifying patients in hospital: are more adverse events waiting to happen?
D C Perry, S J Scott

Miscellaneous

- 89 Echo: Does telephone triage of emergency calls identify patients with acute coronary syndrome?
- 115 Echo: EQA deems UK breast screening satisfactory
- 139 Echo: Informed consent continues to baffle
- 160 Echo: Curb on gastroscopy will have little impact on patient outcome
