

Supplementary file 2

1. Matrix of how individual, included articles support the refinement of the initial programme theory by describing principles of academic detailing and educational outreach visiting and whether they support their relation to changes in prescribing (or not).

Outcomes: intended change in prescribing *qualitative studies in italics*

Outcomes: equivocal / no change *qualitative studies in italics*

Articles in chronological order	Design programs to meet needs	Evidence-based approach Establish credibility	Concise educational materials	Acknowledge controversial issues.	Make practical recommendations	Hire and train clinicians	Training	Timing and location	Establish rapport	Elicit needs	Tailor EV	Interactive discussions	Repeat key messages	Elicit commitment	Provide resources	Sustain relationship
