

Appendix**NICORE Individual Hospital Summary Information**

	Unit	%	Comparative Group A	%	Regional	%
<u>Details of Care Provided</u>						
Total no. of episodes of neonatal intensive care	77		295		799	
Total no. of infants requiring neonatal intensive Care	76		294		732	
Very low birth weight 1500g or less	19	25.0	91	30.9	189	25.8
Birth weight greater than 1500g	56	73.7	201	68.3	536	73.2
Unknown	1	1.3	2	0.7	7	1.0
Total no. of days level 1 care	116	6.7	1213	17.4	3405	24.3
Total no. of days level 2 care	399	23.1	1604	23.0	3822	27.3
Total additional no. of days level 3 care	1214	70.2	4165	59.7	6795	48.5
No. of infants ventilated	27	35.5	122	41.5	292	40.0
Total days ventilation	101		609		1807	
No. of inborn infant episodes of neonatal intensive care	68	88.3	247	83.7	626	78.4
No. of outborn infant episodes of Neonatal intensive care	9	11.7	46	15.6	168	21.0
Status Unknown	0	0	2	0.7	5	0.6
<u>Quality Markers</u>						
Antenatal steroids administration for gestation 34 weeks or less.	33	89.2	118	75.6	296	78.5
Capillary blood sugar measurements where weight lay below 10 th centile for gestation.	9	69.2	33	89.2	97	87.4
Admission temperature less than or equal to 36°C (Transfer status = no transfer or transfer before or during labour)	32	48.5	94	38.0	170	27.2
Admission temperature less than or equal to 36°C (Transfer status = after birth)	2	20.0	11	23.4	22	13.2
Screening for Retinopathy of Prematurity for infants < 32 wks gestation or birth weight < 1500g	16	72.7	74	69.8	127	55.9
<u>Outcomes : morbidity, mortality</u>						
Septicaemia proven	6	7.8	29	9.8	83	10.4
Necrotising Enterocolitis	1	1.3	5	1.7	13	1.6
Pneumothorax	4	5.2	22	7.5	57	7.1
Patent Ductus Arteriosus	4	5.2	25	8.5	82	10.3
Seizures	13	16.9	32	10.8	53	7.2
Congenital malformations	4	5.3	27	9.2	110	15.0
Number of deaths	3		19		58
