- Footnote: The population estimates were obtained from mid-year data for 2019 available from the ONS. To determine corresponding sample sizes, we placed the same restrictions on the eligible pool of patients (25,837,067 from CPRD *Aurum* and 4,263,728 from CPRD *GOLD*) that we applied when delineating the cohort of patients with type 2 diabetes: see Supplementary Figures 1 and 2. We limited inclusion to patients who a) contributed at least one year of follow-up during the study period; b) did not exit the study prior to their 5th birthday and c) did not exit the study population prior to 1st March 2020.
